mu-zero HYPERLOOP publishes HYPERLOOP prototypes

Karlsruhe | The student association of mu-zero HYPERLOOP e.V., with which the E.G.O.-Group cooperates, recently presented “NEOWISE,” the prototype of its HYPERLOOP pod.

“NEOWISE” is an innovative transport capsule that can transport passengers and freight with almost the speed of sound through partially vacuum-sealed tubes. This not only shortens travel times but also creates added value for the environment: The Hyperloop pod is virtually emission-free and silent. Within a year, the young research team succeeded in challenging the status quo of mobility and provided an answer to what travel could look like in the future with NEOWISE. Now follows participation in international competitions such as the “European Hyperloop Week” in Valencia.

mu-zero HYPERLOOP was founded in May 2020 at the Karlsruhe Institute of Technology (KIT) and consists of over 60 young creative minds from twelve different disciplines and 16 nations. The E.G.O.-Group has been supporting the non-profit organization since January 2021. The innovative character and sustainability of the concept impress E.G.O. and go hand in hand with its own mission to shape a sustainable future with innovative products.

About the E.G.O.-Group

The E.G.O.-Group (E.G.O.), with its headquarters in Oberderdingen, Baden-Württemberg, is considered one of the world's leading suppliers to manufacturers of household appliances. In considerably more than half of all cases, people worldwide who cook with electricity or gas will do so with technology and products from E.G.O. It all began around 90 years ago when company founder Karl Fischer developed the first electric hotplate suitable for series production. The core values summed up in the words "made by E.G.O." are found not only in your stove but also in washing machines, dryers, refrigerators, and many other household appliances and commercial machines. The supplier covers four different business areas with its technologies and products: Heating, controlling, converting, and connecting. The E.G.O.-Group has around 5,600 employees worldwide, working in 23 sales and production companies in 19 countries. Their drive: Innovations that make people's everyday lives easier, create benefits, and conserve natural resources. In 2020, the group generated sales of 656 million euros. More information is available on the website www.goproducts.com.

The E.G.O.-Group is a member of the BLANC & FISCHER Family Holding.
